Tech Stack

Programming languages - *Python, HTML, CSS, SQL*
Technologies - *Git, Office, Excel, Bootstrap, Django*
Skills - Systems analysis, Object oriented programming

Hyperion Dev - Software developer bootcamp
Dec 2022 - March 2023

Currently enrolled with Hyperion Dev on their software developer bootcamp. Graduation March 2023. Focusing on Python I aim to shift sectors into a programming role. The field excites me and I find the work fascinating.

Education

University of Sussex 2007 - 2010
BA Honours 2:1

Relevant Experience

Website manager / **Production manager** / **administrato**r @ Barefaced audio, Brighton
DATES

Responsible for the customisation to elements of the new website and ordering system. Created an automated ticket creation system for orders and automated email responses reducing the need to manually reply to the majority of customer emails. Entirely self led. Managed production and aligned it with customer expectations. Increased factory output and our cash flow position (previously orders were paid for in arrears). I was given quite an open scope with this role and used my problem solving skills and ability to learn quickly to streamline web orders, optimise production and automate a lot of previously error prone, human data entry tasks.

Person Specification

I am currently working as a manager for a small landscaping company in Brighton. Although this field is very different to programming I have certainly learnt a lot from it. The most enjoyable aspect of the job is problem solving. I really enjoy overcoming obstacles and learning new skills. Building while part of a team I have demonstrated my problem solving abilities, ability to learn new skills (been working there for 3 years and have gone from novice to manager), ability to lead and be part of a team and learnt to communicate elements of the build with customers in a clear and jargon free manner.

Keen to learn new technologies and apply them to solving problems I will dedicate myself to continually growing and working hard to see projects completed. Although I am coming from outside the field I have a lot of experience from a broad range of settings that will strengthen my ability to work in a team or independently.

I am consistently hard working, eager to learn and will strive to be an asset to your company.

"Harry Johns is a talented, responsible, and dedicated student who possesses a sound work ethic and a maturity beyond his years. His enthusiasm for learning is great and I have little doubt that he will be successful in whatever career path he chooses." – Scott McGill (BA Course Leader BIMM 2009, Former guitarist for Robert Hazard, featured in Guitar player magazine).
